## Mountain Lion Advisory Posted at Folsom Lake SRA

SACRAMENTO – With the arrival of warm weather and the busy summer recreational season, California State Parks has posted signs advising the public of the potential presence of mountain lions in the vicinity of Folsom Lake State Recreation Area.

"This is a precautionary measure," said Folsom Sector Superintendent Dan Tynan. "We want our visitors to be aware that mountain lions may be in the area at any time. We urge everyone to use common sense, be alert, stay on designated trails and follow the safety rules of the Department of Fish and Game."

There have been several mountain lion sightings in the Lake Natoma area recently. Tynan said that mountain lions are known to frequent the area and that it is not unusual for them to be seen by the public on occasion.

Folsom Lake SRA is located in the Sierra-Nevada foothills, about 25 miles east of Sacramento.

The DFG has the following recommendations for avoiding encounters with a mountain lion, as well as what to do if attacked by a mountain lion:

- \* **DON'T FEED WILDLIFE:** By feeding deer, raccoons or other wildlife in your yard, you may inadvertently attract mountain lions, which prey upon them.
- \* **DEER-PROOF LANDSCAPE:** Avoid using plants that deer prefer to eat; if landscaping attracts deer, mountain lions may be close by. The California Department of Fish and Game has a brochure entitled "Gardening to Discourage Deer Damage" available at most DFG offices.
- \* **LANDSCAPE FOR SAFETY:** Remove dense and/or low-lying vegetation that would provide good hiding places for mountain lions, especially around children's play areas; make it difficult for mountain lions to approach a yard unseen.
- \* **INSTALL OUTDOOR LIGHTING:** Keep the house perimeter well lit at night - especially along walkways - to keep any approaching mountain lions visible.
- \* **KEEP PETS SECURE:** Roaming pets are easy prey for hungry mountain lions. Either bring pets inside or keep them in a kennel with a secure top. Don't feed pets outside; this can attract raccoons and other mountain lion prey.

\* **KEEP LIVESTOCK SECURE:** Where practical, place livestock in enclosed sheds and barns at night, and be sure to secure all outbuildings.

\* **KEEP CHILDREN SAFE:** Keep a close watch on children whenever they play outdoors. Make sure children are inside before dusk and not outside before dawn. Talk with children about mountain lions and teach them what to do if they encounter one.

### WHAT TO DO IF ENCOUNTERING A MOUNTAIN LION?

\* **DO NOT HIKE ALONE:** Go in groups, with adults supervising children.

\* **KEEP CHILDREN CLOSE TO YOU:** Observations of captured wild mountain lions reveal that the animals seem especially drawn to children. Keep children within your sight at all times.

\* **DO NOT APPROACH A LION:** Most mountain lions will try to avoid a confrontation. Give them a way to escape.

\* **DO NOT RUN FROM A LION:** Running may stimulate a mountain lion's instinct to chase. Instead, stand and face the animal. Make eye contact. If there are small children there, pick them up if possible so they don't panic and run. Although it may be awkward, pick them up without bending over or turning away from the mountain lion.

\* **DO NOT CROUCH DOWN OR BEND OVER:** In Nepal, a researcher studying tigers and leopards watched the big cats kill cattle and domestic water buffalo while ignoring humans standing nearby. He surmised that a human standing up is just not the right shape for a cat's prey. On the other hand, a person squatting or bending over looks a lot like a four-legged prey animal. When in mountain lion country, avoid squatting, crouching or bending over, even when picking up children.

\* **APPEAR LARGER:** Raise your arms. Open your jacket if you are wearing one. Again, pick up small children. Throw stones, branches, or whatever you can reach without crouching or turning your back. Wave your arms slowly and speak firmly in a loud voice. The idea is to convince the mountain lion that you are not prey and that you may be a danger to it.

\* **FIGHT BACK IF ATTACKED:** Many potential victims have fought back successfully with rocks, sticks, caps, jackets, garden tools and their bare hands. Since a mountain lion usually tries to bite the head or neck, try to remain standing and face the attacking animal.
